A spreadsheet is an interactive computer application for organization, analysis and storage of data in tabular form. Spreadsheets developed as computerized analogs of paper accounting worksheets. The program operates on data entered in cells of a table. Each cell may contain either numeric or text data, or the results of formulas that automatically calculate and display a value based on the ...

A punched card or punch card is a piece of stiff paper that can be used to contain digital data represented by the presence or absence of holes in predefined positions. Digital data can be used for data processing applications or, in earlier examples, used to directly control automated machinery.. Punched cards were widely used through much of the 20th century in the data processing industry ...

Punched card - Wikipedia

Abstract: The digitally signed receipt, an innovation from financial cryptography, presents a challenge to classical double entry bookkeeping. Rather than compete, the two melded together form a stronger system. Expanding the usage of accounting into the wider domain of digital cash gives 3 local entries for each of 3 roles, the result of which I call triple entry accounting.

Fig. 1 summarizes the organization of the paper. The two main topics of interest are performance measurements and voluntary disclosure. Section 3.1 presents evidence that earnings, not cash flows, are perceived by CFOs to be the most important performance measure reported to outsiders. The remainder of Section 3 explores the relative importance of various earnings benchmarks and provides data ...

How to Do Accounting Transactions: 12 Steps (with Pictures)

The reactive transport experiments were performed in three columns, in which different pyrite inclusions were embedded in the porous media. The grain size of the pyrite was the same of the surrounding sandy matrix (125–250 μm), thus the column setups consisted of physically homogeneous but chemically heterogeneous porous media.

Reactive fronts in chemically heterogeneous porous media ...

The 2018 tariff hikes reversed a decades-long push by the US for lower global trade barriers around the world. This column examines the impact of the resulting trade war on the US economy. It estimates a \$68.8 billion annual loss to US consumers and firms from higher import prices, with an aggregate annual loss of \$7.8 billion when producer gains and tariff revenues are
