

## *Advanced Maternal Age Acog Guidelines*

### **Advanced Maternal Age Acog Guidelines**

Objectives. To introduce uniform designations for levels of maternal care that are complementary but distinct from levels of neonatal care and that address maternal health needs, thereby reducing maternal morbidity and mortality in the United States

### **Levels of Maternal Care - ACOG**

The American College of Obstetricians & Gynecologists has issued new guidelines for prenatal diagnostic and screening testing for genetic disorders. These new guidelines will become the new rules by which obstetricians administer prenatal testing. Previous guidelines ACOG has long established the standard of care for obstetric practice in the United States.

Prenatal testing consists of prenatal screening and prenatal diagnosis, which are aspects of prenatal care that focus on detecting problems with the pregnancy as early as possible. These may be anatomic and physiologic problems with the health of the zygote, embryo, or fetus, either before gestation even starts (as in preimplantation genetic diagnosis) or as early in gestation as practicable.

INTRODUCTION. Preterm birth refers to a delivery that occurs before 37 weeks of gestation. It may or may not be preceded by preterm labor. Seventy to eighty percent of preterm births (PTBs) are spontaneous: due to preterm labor (40 to 50 percent) or preterm premature rupture of membranes (20 to 30 percent); rarely cervical insufficiency results in spontaneous preterm birth.
