Cultural dissonance (education, sociology, anthropology and cultural studies) is an uncomfortable sense of discord, disharmony, confusion, or conflict experienced by people in the midst of change in their cultural environment. The changes are often unexpected, unexplained or not understandable due to various types of cultural dynamics. Studies into cultural dissonance take on a wide socio ...

Gender identity is the personal sense of one's own gender. Gender identity can correlate with assigned sex at birth or can differ from it. All societies have a set of gender categories that can serve as the basis of the formation of a person's social identity in relation to other members of society.. In most societies, there is a basic division between gender attributes assigned to males and ...

Recent studies have documented that performance in a domain is hindered when individuals feel that a sociocultural group to which they belong is negatively stereotyped in that domain. We report that implicit activation of a social identity can facilitate as well as impede performance on a quantitative task. When a particular social identity was made salient at an implicit level, performance ...
