MGF 1107 — MATHEMATICS FOR LIBERAL ARTS — CAMA (3) [] This terminal course is intended to present topics which demonstrate the beauty and utility of mathematics to the general student population.

### **USF :: Department of Mathematics & Statistics**

This is a list of women who have made noteworthy contributions to or achievements in mathematics. These include mathematical research, mathematics education, the history and philosophy of mathematics, public outreach, and mathematics contests

### **List of women in mathematics - Wikipedia**

Mathematics arises from many different kinds of problems. At first these were found in commerce, land measurement, architecture and later astronomy; today, all sciences suggest problems studied by mathematicians, and many problems arise within mathematics itself. For example, the physicist Richard Feynman invented the path integral formulation of quantum mechanics using a combination of ...

Format Converters (Fixed to Free, Tidy up, etc.) CONVERT - Metcalf and Reid: EZUP: FORTRAN 77 to ELF90 Compatible Format - No cost but not public domain: FOR2HTML - a PERL script that translates FORTRAN sources into HTML pages. It automatically generates backward and forward links to all SUBROUTINE and FUNCTION calls, INCLUDED files and BLOCK DATA sections.

### **Free Software - Fortran**

An integral is a mathematical object that can be interpreted as an area or a generalization of area. Integrals, together with derivatives, are the fundamental objects of calculus. Other words for integral include antiderivative and primitive. The Riemann integral is the simplest integral definition and the only one usually encountered in physics and elementary calculus.

We study geometric properties of GL-spaces. We demonstrate that every finite-dimensional GL-space is polyhedral; that in dimension 2 there are only two, up to isometry, GL-spaces, namely the space whose unit sphere is a square (like  $\ell_\infty^2$  or  $\ell_1^2$ ) and the space whose unit sphere is an equilateral hexagon.

Scientific poster session (deadline passed) The ICCOPT 2019 will schedule a poster session. If you would like to present a poster, please submit its title and abstract via the conference web system Converia. You also need to connect you poster to one of the topic clusters of the conference.. Please note that

### **ICCOPT 2019**

A cubic spline is a spline constructed of piecewise third-order polynomials which pass through a set of  $m$  control points. The second derivative of each polynomial is commonly set to zero at the endpoints, since this provides a boundary condition that completes the system of  $m-2$  equations. This produces a so-called "natural" cubic spline and leads to a simple tridiagonal system which can be ...
